

Appendix B

Guidelines for guests doing ANY Scuba training.

- **All** medications and conditions **MUST** be declared as only a **Doctor of Barometric Medicine** can declare them safe for use while diving. This will prevent unnecessary delays before diving can commence while on island.

A Doctor of Barometric Medicine will be available in your area and can be located by calling Divers Alert Network at **1-919-684-2948**

Guests must complete the medical questionnaire Appendix F.

Any **YES** answer will require a doctors clearance.

Failure to declare a medical condition could result in injury or death.

- **Resort Course:** This is for Uncertified divers and entails a short theory and pool session in the morning and a shallow dive in the afternoon.
- **Refresher:** All divers who have not dived for more than 2 years need to do a refresher.
This entails a pool session with an instructor to complete a skills circuit.
- **Scuba Review:** All divers who have not dived in more than 7 years need to do a scuba review. This entails completing a short workbook and quiz as well as a pool session skills circuit review.
- **Open Water Referral:** All referral candidates must bring the referral documents from the referring instructor. Failure to do so will delay the course while they are sourced.
- **Full Open Water Students:** Course takes 4 days to complete and involves 5 theory sessions, 5 pool sessions, a written exam and 4 open water check out dives.
