Display until April 23, 2013

**TESTED: AZIMUT 55S, PRESTIGE 500 S, SALISH SEA 48, DEEP IMPACT 360 C**

## And Three Recent Boat Shows You Won't See Covered in Power & Motoryacht

- ▶ 45-plus-foot "tri-toon" pontoon-boat technology
- ▶ Test or Arrest Single-Use Disposable Breathalyzers
- ▶ A gleaming, black go-fast boat that had a crew of eight power-buffing for three straight days leading up to the Miami International Boat Show—see "Get Buffed" on page 82 for all you need to know about waxing your hull the right way.

## QUIZ

**HISTORY**  
What boatbuilder built U.S. Navy PT-109, skippered by Lt. John F. Kennedy in World War II?

**GEOGRAPHY**  
The island of Guadalcanal is part of what country?

**YACHT CULTURE**  
Who played Jack Kennedy in the film version of PT-109?

(HOT SPOT)

## New Digs in an Old Locale

Pay a visit to the **Galápagos Islands** and you're immediately greeted by a combination of geography, waters, and wildlife unlike anywhere else in the world. But it's not easy to stay overnight on this volcanic archipelago. Enter scientist and marine artist Guy Harvey and the newest locations for not one, but two Guy Harvey Outpost Resorts. The Iguana Crossing (shown at right), is a 14-unit boutique hotel situated on the shores of Isabella Island, the westernmost inhabited island, and is currently open for business. And a new 30-unit ecolodge, which will be known as Guy Harvey Outpost Lodge, Galápagos Islands, is currently under construction in the San Cristobal highlands, set to open in 2016. It's well-nigh impossible to secure permits to

build lodgings on the highly restricted islands, but Harvey and his team have some serious credentials. "I know of no other tourism-company operation in the Galápagos that has a scientist and conservation authority as its chairman, and a research institute as a brand partner," said company cofounder Mark Ellert. "For these reasons the park sees our interest in the Galápagos as a game changer." [www.guyharveyoutpost.com](http://www.guyharveyoutpost.com). — Christopher White

## Time Immemorial

Perhaps you're looking for a new watch—maybe something to set yourself apart from the sea of Rolexes, Panerai's, and Omegas favored by boaters. The Bremont "Victory" Limited Edition watch (\$18,500) is the right kind of different. Working in conjunction with The National Museum of the Royal Navy in Portsmouth, England, Bremont will be producing a limited number of bespoke timepieces made with original pieces of oak timber and copper from Lord Nelson's flagship, the HMS Victory. Portions of the proceeds from each sale will go toward the continued refurbishment of the famous ship, which underwent a major refit in 2010. (PEAKS AND TROUGHS)

## Reef Madness

**The Nature Conservancy**, Puntacana Ecological Foundation, the commercial venture Seascope Caribbean, and other conservationists have begun seeding Caribbean coral reefs with fast-growing coral species in hopes of reversing a trend of dying coral coverage as a result of ocean acidification and other factors.

**Australian researchers** reported that shallow corals in the Great Barrier Reef could reach damaging thresholds within 30 years, rather than after the end of this century as initially thought. That spells trouble for ecosystems the world over that rely on coral reefs, and by extension the biosphere of the entire planet.
